# What is coming next - 2

- Merge projects.ez.no into share.ez.no (Q4)
  - *Have a unique entry point for Community Members*
- Job board (Q3?)
  - *Creating the main place for trading jobs around eZ Publish*
- Nurture the existing initiatives !
  - *Tutorials : More technical screencasts/webinars*
  - *Translations : Make it easier for non techies*

# eZ Publish Community Project

# eZ Publish Community Project

- **Community Project | Enterprise Edition**
  - Innovation | Safety, Reliability, Guarantee, Support
- **Community Project**
  - Where most of the development happens
  - Community + eZ Engineers
- **Enterprise Edition**
  - Community Project + professionally-supported extensions
  - GPL or PUL. Available with Enterprise subscription (Premium), and for demo/test purposes.
  - ezoracle, ezsi, monitoring, archiving

# eZ Publish Community Project

- Baking the Community Project in openness & transparency
  - At every step, the community is involved
  - One common goal : innovation
- Step #1 : Governance
  - <http://share.ez.no/blogs/ez/the-community-project-step-1-governance>
  - <http://share.ez.no/forums/discussions/feedback-regarding-the-ez-community-entreprise-announcement>
- Step #2 : Participation

# Governance - eZ Publish Community Project

- Feedback received on Governance
  - Add one recruitment criterion :
    - familiarity with devs in the eZ Ecosystem
  - We need to have members from all around the world and avoid a europe-centric Board
  - A seat should be reserved to a non-technical profile
  - Have 7 members instead of 6 to lead to decisions or enforce majority as in more than 50,01%
  - Licensing

# Participation - eZ Publish Community Project

- Insight on the Participation model
  - Will be decided by the Board
  -

# "The eZ Community, Now & later"
